Requirements Gathering Report		12 / 15	A-											
Requirements Gathering Report	40 / 50	12 / 15	A-	Overall Feedback Good work, Garv. Your GarmentIQ – Data-Driven Apparel Operations & Sales Intelligence System presents a clear and practical business-focused concept, and the report effectively communicates the operational context, business need, and intended value of the system. Your stakeholder analysis, goals, and scope sections are clearly organized, and the identification of risks and priorities shows thoughtful planning. That said, the report would benefit from a more detailed functional requirements section. Currently, the requirements are quite high level; expanding them to describe specific system behaviors (for example: role-based permissions, reporting functions, inventory alerts, or transaction validation) would strengthen the technical clarity of the document. Additionally, including at least two or three fully detailed use cases (with actors, preconditions, main flow, and outcomes) would improve completeness and alignment with course expectations. Overall, this is a solid submission										
Project Proposal Report		13.2 / 15	A

Progress Reports				14.5 / 20	B-
Progress Report 1	7.5 / 10	3.75 / 5	B	Overall Feedback Good effort this week with solid system modeling work and clear progress on diagrams and database preparation. To improve, ensure your report explicitly defines system components with responsibilities, clearly references and explains your architecture diagram, and includes justification for selected design patterns to better align with the assignment expectations.	
Progress Report 2	6.5 / 10	3.25 / 5	C	Overall Feedback Decent progress, but still feels mostly like setup and early implementation. I need to see more concrete features working and some testing next week—right now you're a bit behind.	
Progress Report 3	7 / 10	3.5 / 5	B-	Overall Feedback Late submission. Good progress, I can see real integration and a working system with frontend and backend connected. That's what I expect at this stage. To improve, include more detail around testing and show full workflows working end-to-end.	
Progress Report 4	8 / 10	4 / 5	A-	Overall Feedback Good report with clear evidence of a working system and cloud deployment, which is great to see at this stage. To push it higher, I'd want more depth in testing results and overall system evaluation to better show final readiness.	
Final Technical Report				17.6 / 20	A
Final Technical	44 / 50	17.6 / 20	A	Overall Feedback	

Report		The report demonstrates a solid and well-thought-out system with clear explanation of the full-stack architecture, workflows, and strong integration of operational and analytical components (including Power BI dashboards in Appendix A) . Overall, a strong system and good effort.		
Final Presentation & Demo		28.5 / 30	A+	
Final Project Presentation & Demo	47.5 / 50	28.5 / 30	A+	Overall Feedback Excellent project
Midterm Grade		25.2 / 30	A-
